DRINKING WATER STORAGE TANK

EsyTank 500 is compatible with EsyBox
*EsyBox not supplied with EsyTank

EsyTank 500 Mini is compatible with EsyBox Mini³
*EsyBox Mini³ not supplied with EsyTank

TECHNICAL DATA

Pumped fluid: clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral.

Maximum liquid temperature: 40°C

Maximum environment temperature: 50°C

Maximum capacity: 480 litres

Supply pressure allowed at mains water inlet: max. 6 bar

Dimensions of mains water inlet pipe: ¾"

Dimensions of delivery pipe: 1"

Dimensions of overflow pipe connection: DN 50

Dimensions of front discharge (not drilled): DN40

APPLICATION / EXAMPLES OF INSTALLATION

EsyTank and EsyTank 500 Mini are 480l tanks specifically designed to work seamlessly with EsyBox and EsyBox Mini³ in domestic/residential settings for storing and supplying water and serving as break tanks between the pump sets and mains supply.

EsyTank/EsyTank 500 Mini is recommended for: meeting water demand when the public water supply is insufficient; use as a break tank, where direct-suction pumping systems cannot be installed, to break the connection with the city water supply and thus prevent backflow into the mains water and resulting contamination; use as an intermediate tank in tall buildings to separate the pressure boosting system into a number of zones.

Using EsyTank/EsyTank 500 Mini in conjunction with EsyBox or EsyBox Mini³ allows you to produce a complete energy-efficient pressure boosting system with a series of advantages: a much smaller footprint; a more appropriately sized system so that it fits through smaller doors, like those leading to cellars; the tank comes with all the accessories required for fast installation; unbeatable integration and ease of installation with EsyBox or EsyBox Mini³; use of recycled materials that are fit for use with drinking water.

DESIGN FUTURES

EsyTank/EsyTank 500 Mini is a tank with a 480l capacity, suitable for use with drinking water. It features a valve for filling from the mains with an unrestricted air gap float for backflow prevention, in line with standard UNI EN 1717. The CAT3 version features an AG-type air gap overflow system with DN50 outlet, while the CAT5 has an AB-type air gap system with auxiliary DN50 outlet. The AG- or AB-type overflow systems on both versions are located at the back; the tank comes with an insect guard that can be attached with special screws.

EsyTank/EsyTank 500 Mini comes with EsyDock, suction pipe with foot valve and delivery line. The tank is suitable for fixed mounting above ground: the four slots in the base make it easy to secure to the ground. A plug or a drain line can be connected to the front wall by using the threaded bulkhead adapter that comes with the tank.

And with the special inspection cover, maintenance is made easy, too. The system is modular, allowing you to install tanks on three sides (at the back and either side).

ACCESSORIES

ESYTANK AUXILIARY CITERN	DESCRIPTION
	<p>The EsyTank auxiliary cistern is supplied without any fittings or the EsyDock. The tank has a modular design to couple easily with other EsyTank units, making the system expandable to the necessary capacity. It can be connected on three sides (at side and rear) using the EsyTank tank coupling kit.</p>

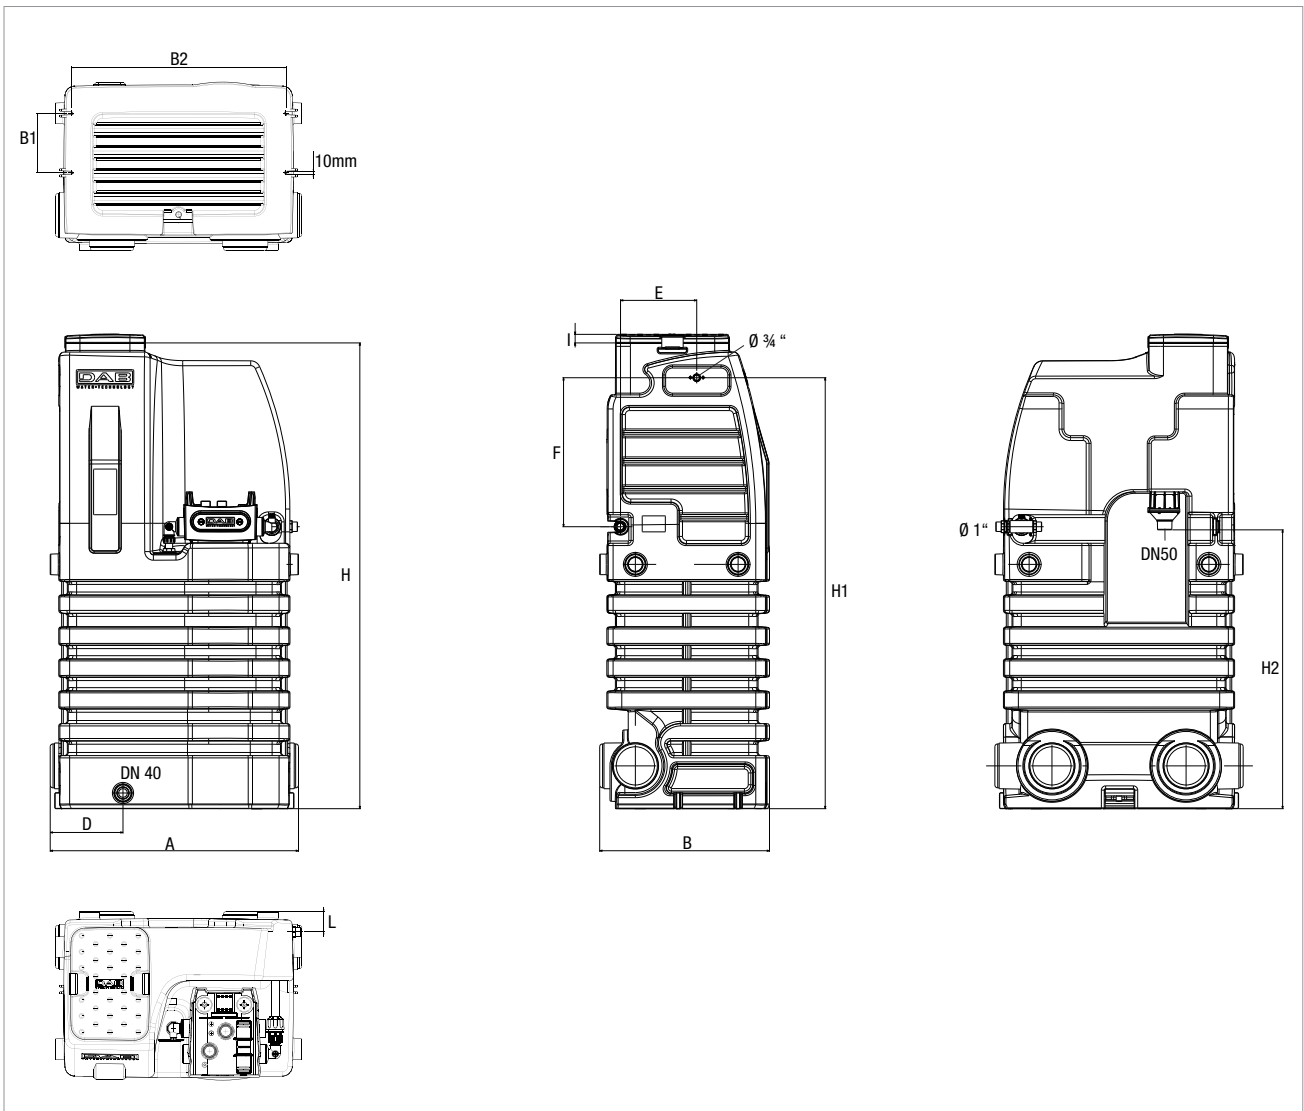

ESYTANK COUPLING KIT	DESCRIPTION
	<p>The EsyTank coupling kit is composed of a PVC sleeve with gasket (D.160 mm L=150), two PVC aligning pipes (D.50mm x L=60) and a connecting ring nut for a 2-pump option. It allows the connection of several EsyTank units or between EsyTank and EsyTank auxiliary cistern.</p>

ESYTANK OPTIONAL DELIVERY KIT	DESCRIPTION
	<p>Composed of a 1" PP pipe. It allows an auxiliary delivery for single tank systems or with the coupling kit it allows several EsyTank systems to be linked together and to create pressure boosting units with several pumps and tanks.</p>

TECHNICAL DATA

Pumped fluid: clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral.

Maximum liquid temperature: 40°C

Maximum environment temperature: 50°C

Maximum capacity: 275 litres

Supply pressure allowed at mains water inlet: max. 6 bar

Dimensions of mains water inlet pipe: ¾"

Dimensions of delivery pipe: 1"

Dimensions of overflow pipe connection: DN 50

Dimensions of front discharge (not drilled): DN40

APPLICATION / EXAMPLES OF INSTALLATION

EsyTank and EsyTank 300 Mini are 275l tanks specifically designed to work seamlessly with EsyBox and EsyBox Mini³ in domestic/residential settings for storing and supplying water and serving as break tanks between the pump sets and mains supply. Footprint is reduced considerably compared to the 480l version.

EsyTank/EsyTank 300 Mini is recommended for: meeting water demand when the public water supply is insufficient; use as a break tank, where direct-suction pumping systems cannot be installed, to break the connection with the city water supply and thus prevent backflow into the mains water and resulting contamination; use as an intermediate tank in tall buildings to separate the pressure boosting system into a number of zones.
